

## GENESIS GROUP COMPANY INFORMATION

---

### Company Background

Genesis Group is a Florida based company that was established in 1976 in Lutz, Florida (formerly known as Piercefield, Amaden and Associates, Inc.). In 1986, the firm became known as Genesis Professional Services, and joined with Genesis Design Services and Biological Research Associates in 1992 to form Genesis Group, Inc. Genesis has attained its current status through employing a well trained professional staff and continually providing a high quality work product from our primary offices in Jacksonville, Tampa, Tallahassee and Gainesville; and our construction administration offices in Crestview, Tampa and Odessa.

Beginning in January 1998, Genesis became an employee-owned company operating as GGI, Ltd., d/b/a Genesis Group, and in April 2003 became GGI, LLC. All key employees remained with our firm (the only change that occurred was the ownership). Being an employee-owned firm has provided new opportunities for our key professionals and has created an increased emphasis on developing and maintaining long-term professional relationships within the communities where the projects are located.

Over the last five years Genesis has maintained a consistent workforce. The following table illustrates our average number of employees for this time period:

<i>Year</i>	<i>Average Number of Employees</i>
2000	112
2001	107
2002	102
2003	112
2004	110
2005	111

Our Tallahassee office was officially opened on July 16, 1993 with a staff of five (5) individuals focused on developing a long-term business capable of providing professional services to the community. Since then, we have expanded our facilities and services to our current staff of 39. Our growth is primarily due to our commitment to the community, our reputation of providing a quality product on time and within budget to our clients, along with our hard work.

## GENESIS GROUP COMPANY INFORMATION

---

The following table illustrates the composition of our staff in Tallahassee, Jacksonville, Tampa, and Gainesville Divisions by discipline:

<i>Discipline</i>	<i>Staff</i>
Professional Engineers	16
Professional Landscape Architects	5
Certified Land Planners	5
Professional Surveyors	3
Engineers in Training	4
Design Technicians	18
Survey Technicians	4
Survey Crew Personnel	18
Transportation Planner	2
CE&I Division	19
Administrative Personnel	17
<b>Total</b>	<b>111</b>

The Tallahassee Division staff will have primary responsibility for services rendered to the client with the vast majority of the work being exclusively completed by this staff. To supplement these services, Genesis has assembled a team of superbly qualified professionals in the disciplines of engineering, architecture, planning, environmental permitting and geotechnical sciences based specifically on their experience with park facilities or similar projects in Florida.
