

Throughout our 30-year history, Kimley-Horn and Associates, Inc. has built a reputation for providing innovative, high-quality consulting services, focusing on traffic operations and planning studies. Today we are one of the largest engineering, planning, and environmental consulting firms in the U.S. with over 1,300 employees in 49 offices in 17 states, including 17 offices throughout Florida. As a leading provider of intelligent transportation system (ITS) services our expertise includes:

- System integrator and systems manager
- Communications architecture and ITS architecture planning and development
- Designing and deploying advanced signal system applications
- Designing and deploying arterial ITS systems
- Program Master Planning and Concepts of Operations for ITS
- Software evaluation, development and integration
- Database and data mining and GIS implementation and integration
- System testing, implementation, and operation
- ITS research
- Traveler information systems and services
- Network simulation and analysis
- Innovative funding for ITS improvements
- MOT and scheduling
- Design
- Partnership development and maintenance
- Public involvement

As a founding member of ITS America, member of ITS Florida and as a system integration firm, Kimley-Horn is an innovator in the planning, design, implementation, and integration of state-of-the-art transportation systems, and we have remained at the forefront of systems design and transportation technology for more than a quarter century. Our staff offers a full spectrum of ITS, design, space planning, software evaluation and development and traffic telecommunications as well as security for ports of entry including airports and seaports.

ITS Vision and Leadership. We provide our clients with an in-depth understanding of the essential and defining characteristics of ITS, why it is more than just a freeway management system, with an emphasis on user services particularly as they enable optimum traveler decisions on modal choice, seamless regional travel, and timely and reliable pre-trip and en-route information. Our systems professionals frequently publish papers and present at symposiums worldwide on the latest available or envisioned ITS technologies.

As a consultant to FDOT recently on the I-95 Intelligent Corridor Study and Design, the Statewide ITS Communications Study, the Golden Glades Post- Construction CCTV Design, the Statewide 47 MHz Microwave Communications Study, and the Turnpikewide AVI Design projects, we have established ourselves as one of the foremost firms in Florida for ITS services. While always relying on our clients' ITS objectives, preferences, and constraints, we offer the full array of ITS support services to serve your needs.
