

COMPANY PROFILE

From its origins as a supplier of traffic enclosures and other fabricated metal products to the transportation business, Southern has evolved to be a key supplier of wired ITS field cabinets nationwide. This strong background in the engineering and design of enclosures allows Southern to offer custom enclosures as well as the more traditional Caltrans type enclosures for the full range of ITS applications including CCTV, DMS, HAR, TTD, Junction Boxes, Hub centers, and surveillance applications.

With a UL 508 panel shop Southern can provide ready to use ITS field cabinets wired with the power distribution system, surge suppression, air conditioning, or other devices. Southern's wired 336S and 334 for CCTV and DMS applications are approved by FDOT and listed on the ITS APL as approved field cabinets, certificate number 78561702411011. Both the enclosures and the wiring are UL listed and approved. Southern prides itself in giving customers comprehensive drawing packages for submission to the approving agency or design firm to speed the approval process.

Southern has an extensive list of projects within Florida and beyond. Some of the projects include:

- CCTV enclosures on the Florida Turnpike
- CCTV enclosures and DMS enclosures to OOCEA
- Interstate 95 in Dade, Broward, Palm Beach, Martin, St. Lucie & Indian River Counties
- Interstate 75 in Lee, Charlotte, and Manatee Counties
- Polk Parkway, Veterans Parkway, Suncoast Parkway, & Palmetto Expressway
- Perimeter beltways in Atlanta
- Interstate 40 in Memphis and Nashville, TN
- Multiple projects in Pennsylvania, Virginia, Mississippi, Washington, and New York.

Southern also manufactures LED lane use control signal, blank out signs and illuminated street name signs. One of our most visible recent projects was the Bay Street corridor in Jacksonville that uses 176 lane use signals to manage the flow of traffic including ingress to and egress from the stadium. In addition to the standard three way lane control signs, some of the signs have center turn arrow displays, left turn arrows, or symbolic no turn symbols.
