

## Telvent Farradyne Inc.

### *Building the Future of ITS*

With a long-standing commitment to Intelligent Transportation Systems (ITS), Telvent Farradyne Inc. offers ITS expertise that is much broader and deeper than other firms in the industry. Telvent Farradyne's continuing involvement in planning, designing, deploying and operating state-of-the-art systems demonstrates its dedication to being an ITS industry leader.

Telvent Farradyne's powerful array of services, software products and expertise extend through the full range of requirements related to advanced traffic/freeway management, travel information, public transportation and electronic toll collection systems. Services also include system development, integration, testing and operations and maintenance. Telvent Farradyne also provides system solutions for parking management, traffic enforcement, traffic signal, transit fare payment and tunnel control system applications.

Telvent Farradyne's project management and system development processes have been certified and re-certified as compliant with ISO 9001 standards, and regularly pass semi-annual independent audits. Telvent Farradyne has also developed software according to processes in compliance with Level 2 requirements of the Software Engineering Institute's Capability Maturity Model.

Telvent Farradyne's parent company, Telvent, (NASDAQ: TLVT), the Global RealTime IT Company, specializes in value-added solutions and services in four industry sectors (Energy, Traffic, Transport and Environment). Its technology allows high-performing companies to make real-time business decisions using data acquisition, control and advanced operational applications, providing secure actionable information delivery to the enterprise.

Telvent Farradyne has offices across the nation including offices in Fort Lauderdale, Orlando and Tallahassee, Florida.
